Summary of Services or Products

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. We not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but we also provide laboratory supply sales, field, and sampling services with weekly sample pick-up routes, as well as environmental services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. We provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste.

Accurate Environmental Training Center (AETC) is an award-winning training center offering operator and laboratory certification and renewal classes at our classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, we can tailor our training to meet the needs of each individual student.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance and reduce operating costs.
