

ENVIRONMENTAL FEDERATION OF OKLAHOMA

Colin Brooks

Colin Brooks is an experienced geologist, GIS analyst, data manager, and science nerd. He currently works as a geologist for the Oil and Gas Conservation Division at the Oklahoma Corporation Commission (OCC).

Colin has spent the past six years as a regulator in the Induced Seismicity Department mitigating seismic hazards across Oklahoma. He takes pride in discovering new ways to present legacy oil and gas well data and earthquake data in visually effective and informative GIS platforms.

Currently, he maintains the OCC's ArcGIS Enterprise server and GIS applications for his Agency. In his personal time, he enjoys woodworking, fishing, and traveling with his wife and their two dogs.
