

ENVIRONMENTAL FEDERATION OF OKLAHOMA

Terri Roberts

Ms. Roberts has been working in the refined petroleum industry for over thirty-five years. Since 2014, she has managed the Storage Tank Oversight Program (STOP) for Oklahoma Environmental Services which provides monthly web-based online Statistical Inventory Reconciliation (SIR) release detection and compliance services

for over 250 customers. She serves as a marketing representative with field experience in services performed by Oklahoma Environmental Services including real estate assessments, petroleum tank removals, drilling of monitor wells, soil and groundwater sampling, and project management of remediation locations in Oklahoma and Texas. She serves as an industry liaison for legislative and regulatory issues that impact OES and its customers through trade association boards, industry conference presentations, and in regulatory agency councils and meetings.
