Summary of Services or Products

Customized waste processing solutions for hazardous and non-hazardous industrial and commercial waste, including landfill diversion and sustainability programs, solidification of liquid waste, recycling, wastewater treatment, and waste sequestration

VLS Environmental Solutions is a leader in sustainability solutions, with three divisions providing industry-leading services. The company's Waste Services division provides customized waste processing solutions for hazardous and non-hazardous industrial and commercial waste, including landfill diversion and sustainability programs, solidification of liquid waste, recycling, wastewater treatment, and waste sequestration. The company's Railcar Cleaning and Repair Services division provides specialty cleaning services for difficult-to-clean products, including chemicals, hardened materials, and pressurized gases, and comprehensive repair services for certified full-service repairs, tank car qualifications, and maintenance. The company's Marine Services division offers state-of-the-art barge cleaning, repair, and gas-free facilities for various chemical solvents and downstream petroleum products. VLS has over 1,000 employees in 40 locations across North America.
