Summary of Services or Products

The Oklahoma Water Resources Board is the only state agency solely dedicated to the tasks of managing, protecting, and improving the water resources of Oklahoma to ensure safe, clean, healthy and reliable water supplies, a strong economy, and a healthy environment.

The OWRB allocates water rights permits, provides financing for water and wastewater projects, monitors water quantity and quality, oversees Oklahoma's Water Quality Standards, manages the state's well driller and pump installer licensing program, coordinates the state's floodplain management and dam safety programs, and provides comprehensive planning for the state's water future.

The OWRB provides a variety of water resources career opportunities, employing hydrologists, geologists, biologists, meteorologists, environmental specialists, engineers, financial analysts, administrative and clerical professionals, writers, and attorneys.
