### Summary of Services or Products

Strata, LLC provides a full range of professional environmental, compliance, engineering, and technical services nationwide, serving heavy industrial, commercial, and public and private sector clients since 1997. We don't believe in a "one size fits all" approach to any project which is why we focus on creating a tailored approach for compliance management systems. Our team of project managers and technical staff is well versed in all environmental media including Air, Water, Waste, Chemical Management, and Injection Wells/Underground Injection Control (UIC). All Strata projects are implemented by our team with experience as engineers, EHS managers, regulators, and stack testers in a variety of industries. *Subsurface / Underground Injection Control:* We have completed UIC permits and have provided field activity supervision for facilities throughout the country. We have experience in all aspects of both new and existing deep wells ranging from feasibility studies and well design, installation, maintenance, testing, waste disposal facilities, governmental agencies, and the USEPA.
